

Vision of the
project

Preservation of
tropical rainforests,
reduction of CO₂ and
protection of their
animal and human
inhabitants

Goals and facts Wehea Project - supported by the local governor and fans for nature e.V.

Goals of the Weheea Project

Preservation of the area

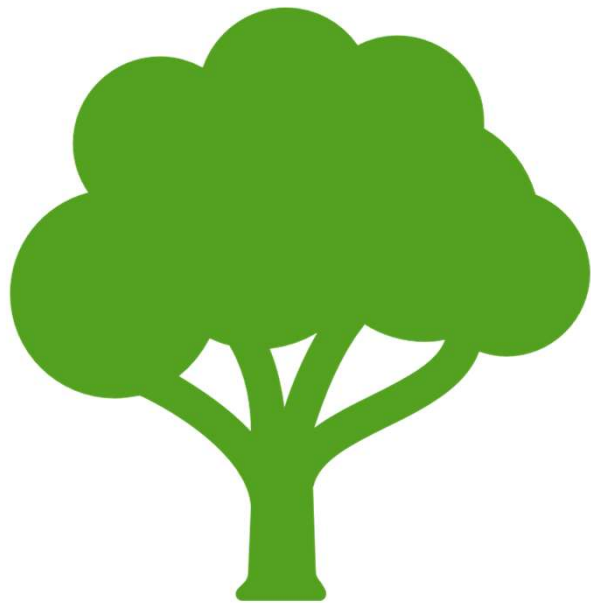

Extension of the area

Increase protection status

Gentle tourism (limited number of visitors)

Use of the existing infrastructure for release projects

Creation of volunteer places for people from all over the world

CO2 calculation for Wehea

- ▶ 240 hectares of CO2 are bound in one hectare of primary rainforest
- ▶ If destroyed, 1 ha of rainforest releases 450 tons of CO2
- ▶ at Wehea: 22,500,000 tonnes of CO2 are bounded
- ▶ Source: Save the Rainforest association and Ludwig Maximilian University Munich

Current Project Figures Wehea

One time investment

- Pick-Up car: around 28.000 USD
- 2 Moto cycles: around 12.000 USD
- Maintenance of the street/new bridge: around 10.000 USD
- Maintenance of the building: around 10.000 USD

Yearly ongoing costs

- Salary for the ranger: 45.000 USD
- Maintenance Infrastruktur: 6.000 USD

Possible Second Project Phase

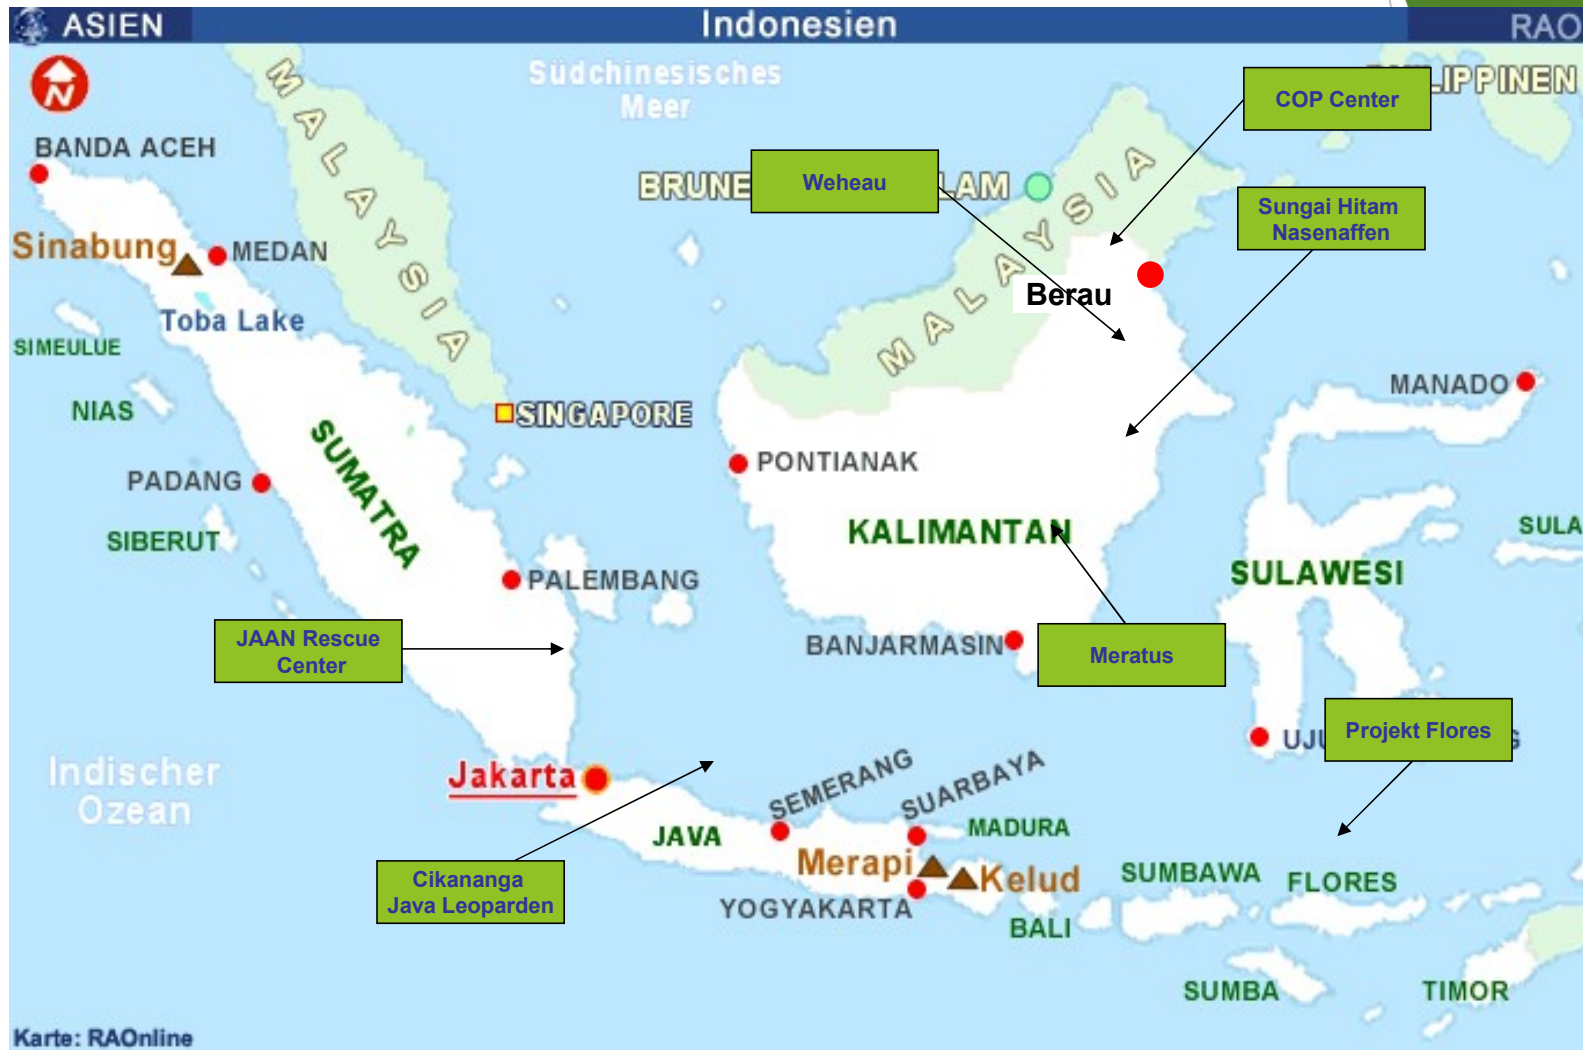

One time investment

- Possible extension rainforest area
- Idea will be supported by the locals and Indonesian forest minister
- New buildings and infrastructure extension
- Figures have to be calculated and negotiated

Running costs

- More staff / rangers necessary - salary increase
- Higher maintenance costs
- Figures have to be calculated later

Overview all seven Fans for Nature Projects in Indonesia

Why are new partner necessary for Weheea?

According to renowned scientists the conservation of tropical rainforests is vital for the survival of the earth

Weheea with its unique rainforests must be preserved for the next generations

There are other potential / similar 6 projects in Indonesia waiting for support

The destruction of the rainforests continues unabated, which means that the financial expenditure for these projects increases steadily

In order to be able to achieve the goals urgently need strong partner

Advantages for Partner

Climate protection is becoming more and more public awareness

Preservation of rainforest area by potential partners would have a huge signal effect

All vehicles, buildings and uniforms could be used as advertising space

The reach is increased through social media

The project status will be transparent according to its own principles

Climate protection with a signal effect: joint, media-effective press and public relations work

Supporters

- ▶ **Hannes Jaenicke:**
 - ▶ well-known actor and climate activist
- ▶ **Ledjie Taq:**
 - ▶ Customary Head of Wehea Dayak Community, Indonesia
 - ▶ Spoken at the 2015 World Climate Conference in Paris for the preservation of Wehea
- ▶ **Hardi Baktiantoro:**
 - ▶ Leading person Centre of Orangutan Protection Borneo (COP)
- ▶ **Demang Linus:**
 - ▶ Leading person from Conversation Action Network Borneo (CAN)
- ▶ **Fans for Nature e.V.**
 - ▶ Founded Wehea, built up the relationships in Indonesia at the beginning¹⁰

The background features abstract green geometric shapes. On the left, a light green triangle points upwards. On the right, a dark green triangle points downwards, with a thin white line intersecting it. At the bottom right, a light green triangle points upwards, partially overlapping the dark green one.

Thank you for your attention.
Please support the project.
Without help the rainforest and
the animals cannot survive

Primates helps Primates!
